Daily Challenge **Happy Coding from necse**  **SkillRack**

Matrix Sum - L or Inverted L

The program must accept an integer matrix of size **N*N** as the input. The program must find the sum of integers in the **L-shape** and **inverted L-shape** of the matrix. If the sum of the integers in L-shape and the sum of the integers in inverted L-shape are equal then print **YES** as the output. Else the program must print **NO** as the output.

Boundary Condition(s):
3 <= N <= 50
1 <= Matrix element value <= 1000

Input Format:
The first line contains N.
The next N lines each contain N integers separated by a space.

Output Format:
The first line contains either YES or NO.

Example Input/Output 1:
Input:
4
1 6 3 4
2 3 4 2
3 4 5 5
4 5 6 7

Output:
YES

Explanation:
The integers in the L-shape are highlighted below.
1 6 5 4
2 3 4 2
3 4 5 3
4 5 6 7
The integers in the inverted L-shape are highlighted below.
1 6 5 4
2 3 4 **2**
3 4 5 **3**
4 5 6 **7**
The sum of integers in the L-shape (1+2+3+4+5+6+7) is **28**.
The sum of integers in the inverted L-shape (1+6+5+4+2+3+7) is **28**.
Both the sum values are equal. So YES is printed.

Example Input/Output 2:

Input:
5
7 27 20 60 67
82 77 12 74 32
98 14 62 1 77
45 11 55 6 92
27 30 30 27 8

Output:
NO

Example Input/Output 3:
Input:
7
5 4 8 4 2 6 2
2 9 7 1 1 2 3
1 3 2 7 2 3 3
2 3 8 6 7 9 8
6 4 5 1 4 2 1
8 2 9 3 2 1 3
7 4 2 5 4 3 7

Output:
YES

Max Execution Time Limit: 50 millisecs

Ambiance

Java (12.0)

```
import java.util.*;
public class Hello {

    public static void main(String[] args) {
        //Your Code Here
        Scanner sc=new Scanner(System.in);
        int n=sc.nextInt();
        int sum1=0;
        int sum2=0;
        int[][] arr=new int[n][n];
        for(int i=0;i<n;i++){
            for(int j=0;j<n;j++){
                arr[i][j]=sc.nextInt();

                if(i==n-1 || j==0){
                    sum1+=arr[i][j];
                }
                if(i==0 || j==n-1){
                    sum2+=arr[i][j];
                }
            }

        }
        if(sum1==sum2){
            System.out.print("YES");

        }
        else{
            System.out.print("NO");
        }
        //System.out.print(sum1+" "+sum2);
    }
}
```

Code did not pass the execution

Input:

```
4
1 6 3 4
2 3 4 2
3 4 5 5
4 5 6 7
```

Expected Output:

```
YES
```

Your Program Output:

```
28 28
```
