## Greater Values in Array

An array of N integers and an integer value M are given as input. The program must print all the values which are greater than M in the array.

### Boundary Condition(s):

1 <= N <= 1000

### Input Format:

The first line contains the value of N and M separated by space(s).

The second line contains N integers separated by space(s).

### Output Format:

The first line contains the integers greater than M separated by a space.

### Example Input/Output 1:

Input:

6 4

1 4 6 2 9 1

Output:

6 9

### Example Input/Output 2:

Input:

8 45

21 46 78 16 40 56 89 35

Output:

46 78 56 89

**Max Execution Time Limit: 5000 millisecs**

Ambiance

Java ( 12.0)

```
1  import java.util.*;
2  public class Hello {
3
4      public static void main(String[] args) {
5          //Your Code Here
6          Scanner sc=new Scanner(System.in);
7          int n=sc.nextInt();
8          int a=sc.nextInt();
9
10         int[] arr=new int[n];
11
12         for(int i=0;i<n;i++){
13             arr[i]=sc.nextInt();
14             if(arr[i]>a){
15                 System.out.print(arr[i]+" ");
16             }
17         }
18
19     }
20 }
21 }
```
