String Circular Print

A string S and an integer N is passed as input. The program must traverse and print N alphabet letters in the string circularly.
Note: All the alphabets in the string S is only in lowercase.

Boundary Condition(s):
2 <= Length of String <= 1000

Input Format:
The first line contains the string S.
The second line contains N.

Output Format:
The first line contains the N alphabet letters.

Example Input/Output 1:
Input:
hello
7

Output:
hellohe

Example Input/Output 2:
Input:
yum
7

Output:
yumyumy

   Max Execution Time Limit: 5000 millisecs

Ambiance

Java (12.0)

```java
 1   import java.util.*;
 2   public class Hello {
 3
 4       public static void main(String[] args) {
 5           Scanner sc=new Scanner(System.in);
 6           String str=sc.nextLine();
 7           int n=sc.nextInt();
 8           int a=n/str.length();
 9           int b=n%str.length();
10           for(int i=0;i<a;i++){
11               System.out.print(str);
12           }
13
14           System.out.print(str.substring(0,b));
15
16
17       }
18   }
```
