Print First and Last Character

A string S is passed as input. The program must print the first and last character of the string.

Boundary Condition(s):
1 <= length of String <= 1000

Input Format:
The first line contains the string S.

Output Format:
The first line contains two characters.

Example Input/Output 1:
Input:
hello

Output:
ho

Example Input/Output 2:
Input:
mango

Output:
mo

Max Execution Time Limit: 5000 millisecs

Ambiance

Java (12.0)

⛶

```
 1  import java.util.*;
 2  public class Hello {
 3
 4      public static void main(String[] args) {
 5          //Your Code Here
 6          Scanner sc=new Scanner(System.in);
 7          String str=sc.nextLine();
 8          System.out.print(str.charAt(0)+""+str.charAt(str.lengt
 9
10      }
11  }
```
